V.EXPECTED OUTPUTS

- ❶ Project activities related information is shared among the project stakeholders(local authorities, beneficiaries and ANSP+) through the meeting;
- ❷ The Bar /Lodge Managers will have sufficient knowledge about HIV Prevention, Family planning, human right, sexual reproductive health, male circumcision, and consistent use of condom, TB, hepatitis and malaria ;
- ❸ The Bar/Lodge Managers will share the knowledge with their customers and neighbors

VI. MISSION ACHIEVEMENTS

The Picture of the DAF of ANSP+: NIZEYIMANA JEAN MARIE VIANNEY welcoming the participants at Musanze District .

The meeting started by introduction the DAF OF ANSP+ Nizeyimana Jean Marie Vianney welcomed all participants and did introduction of ANSP+ to the bar/lodge Managers ,he said that ANSP+ started on 2000 by the people living with HIV , where HIV people was discriminated and stigmatize in community but with the advocacy of ANSP+ ,different partners and government support the stigma and discrimination faced by people living with HIV was reduced . He continue explaining that ANSP+ are working in three areas of intervention: Human Right, HIV Prevention and Poverty Reduction.

The health center provider started by asking bar lodge managers why are them invited to the training ,it is because they are the one who receive many customers at their daily work ,Many of the customers after taking beers ,they pay also for room where they go to the room with girls for doing sex . she continue asking the bar lodge Manager to protect customers by putting condom at the room and sensitize them to come to take condom for free at the health sector for HIV Prevention .she sensitized the bar Managers to mobilize customers for HIV Testing at the health facility and motivate them for circumcision for those men who never did it .she said that condom use it not only for HIV prevention but it is also use before sex for prevention of hepatitis ,cervical cancer and some people are using it for family planning.

She explained also about the Target of Government 95%, 95%, and 95%

The first 95% is 95 % person who know there status

The second 95% is 95% of the person who know that they are HIV positive and their taking drugs

The last 95% is 95% of the person who know their status who are taking HIV drugs their viral road suppressed

She said so many women are contracting the cervical cancer because they did sex with Men who never did a circumcision that being circumcised is necessary because it prevent HIV at 40%.

In Musanze District 6368 people are HIV Positive,72 are refusing to take HIV Drugs.26,1%Female Sex Workers are HIV Positive,5,4% Men doing Sex with Men have HIV.

For HIV prevalence in Musanze, Men 4174 are HIV Positive ,Women 2122 are HIV Positive

The health center provider continues explaining the sign of TB and said that so many time when a person have TB have also HIV.The sign of TB are: weakness, having a fever ,lost weight .
